Species is the number of species recorded on the transect in 2011, *Duration* is the average time the transect took to walk, and *Completeness* gives the number of weeks out of the 26 between April 1st and September 29th when the transect was not walked.

Transect results

Transects are the main method of measuring how butterfly populations change with time. The technique is simple, involving walking the same set route every week in good weather throughout the summer months, and noting down the numbers of each species of butterfly seen within about 5 metres.

Transect Roundup

Only notes received from the transect walkers or organisers are included.

Aldbury Nowers SP 952 129

First walked: 1992 2011 recorder: Paul Thrush

Balls Wood TL 344 106

First walked: 1994 2011 recorders: Andrew Wood & Alan Reynolds

"The overall number of butterflies was up 10% compared to 2010.

The winter of 2010/2011 saw major work taking place in the wood. Much of the work was off transect, but there was a major change to sections 8/9 where the southern section on section 8 and all of the cross ride 9 were felled to a width of about 25m. So for much of the year this was a rather bare and open area, though by the end of the season aspen, grasses and brambles were re colonising. Ride centres were mowed on a couple of occasions that helped ease of access to the walk. For the second year running the wood was probably as dry over the summer as it has ever been. The number of species seen on the transect was down one with no Holly Blue, Small Copper or Purple Hairstreak recorded, these being balanced by positive records for Small and Essex Skippers". Andrew Wood

Beane Hill TQ 199 873

First walked: 1988 2011 recorders: Leslie Williams, Michael Berthoud, Simon Mercer

Bedfont Lakes TQ 080 724

First walked: 1996 *2011 recorders:* Richard Featherstone, Philip Allen, Jenn Hartland, Kayla Terry, David Gingell, Zula Kukielka, Michaela Terry, Carolyn Herbert

"IOur transect walk was changed this year to shorten the route's length., although it still coversthe main habitats that the site offers. Brwon Argus showed in good numbers again and Purple hairstreak were recorded for the second year." Richard Featherstone.

Bencroft Wood TL335065

First walked: 2004 2011 recorder: Steve Kiln

"one less species than 2010 but first time I have seen Brown Argus and saw Small Copper again no small t shell or white admiral. Plenty of Green veined White on 22 July..glade is greening up since year before put still very few plants I think due to poor soil." Steve Kiln.

Bishops Stortford Southern Country Park

First walked: 2004 2011 recorder: Bob Clift

"I'm surprised to discover that although the total count is lower, on the whole this year's results, species by species, have been better than last year's for Southern Country Park, as all through the summer weeks it felt very poor in comparison to 2010.. But the lovely spring weather this year made a big difference with the Brimstones and Orange Tips and all of the Whites seen in greater numbers, especially the Small White. Other increases this year were the Holly Blue, Small Tortoiseshell (over twice the amount), Speckled Wood, Marbled White (the best year yet), and a big rise for the Red Admiral. A late welcome visitor was a Small Heath, last recorded in 2007. On the noticeably down side were the Common Blue (over 70%), the three golden Skippers, Gatekeeper, Comma and Ringlet. The long chalky wild flower bank in the SCP has never looked so good as this year, and the knapweed has been incredible, but it has been almost bereft of Small Tortoiseshells, Red Admirals and Peacocks - and I have not seen one Painted Lady this year." Bob Clift

Brent Reservoir TQ 213 873

First walked: 2000 2011 recorders: Andrew Self, Roy Beddard, Andrew Verrall

Bricket Wood TL 131 009

First walked: 1997 2011 recorders: Malcolm Hull & Colin Everett

"TTotal butterfly numbers recorded the highest annual total in the 15 years this transect has been running. 24 species were recorded on the transect, with two others, White-letter Hairstreak and Purple Emperor, recorded elsewhere on the Common. Three species, Ringlet, Marbled White and Silver-washed Fritillary recorded their highest annual totals. Other butterflies which were significantly above average numbers included Large Skipper, Brimstone, Green-veined White, Brown Argus, Holly Blue, Red Admiral, Speckled Wood and Meadow Brown. White Admiral numbers were in line with the long term average, but up on last year. Butterflies whose numbers were significantly down on the long term average included Essex Skipper, Large & Small Whites, Painted Lady, Peacock and Comma. There last two are of most concern. Peacocks were 65% down on long term average and 75% down on two years ago. Comma were down 50% on long term average and 65% on two years ago. On the plus side Small Tortoiseshell made a welcome re-appearance after 3 years absence and numbers were nearly back up to the long term average level. The site continues to be well managed with further coppicing and rotational ride cutting carried out early in the year."

Malcolm Hull

Butterfly World TL 127 043

First walked: 2009 2011 recorder: Malcolm Hull, Mandy Floyd

"A disappointing year in term of overall butterfly numbers, but the number of native species recorded on the transect increased to 17. One further native, Purple Hairstreak was also recorded on the site, as were two escaped tropical species. Common Blues accounted for more than half of all butterflies seen, having formed a massive colony on the acres of planted Birds-foot Trefoil. Six-spot Burnet Moth has also benefited from the same larval food plant and was recorded in its hundreds. Other species increasing in number were mostly associated with the development of the grassland areas. Species recorded for the first time this year included Large & Essex Skipper, Small Copper, Small Blue, Brown Argus and Gatekeeper. Other species showing a significant increase in numbers were Small Skipper, Red Admiral, Small Tortoiseshell and Meadow Brown. Species recorded in earlier years, but not this year were Brimstone, Green-veined White, Holly Blue and Marbled White. Other species whose numbers were well down on previous years included Large White, Small White, Orange Tip, Painted Lady & Peacock. Very few butterflies were seen on the magnificent collection of buddleia." Malcolm Hull

Cranford Park TQ 101 779

First walked: 1997 2011 recorders: Alison Shipley, N. O'Connor,

Danesbury Park TL 230 170

First walked: 1996 2011 recorder: Pat Watt

"The butterfly numbers were down again this year. It was the second worst year since I started recording at Danesbury Park LNR in 1996; the worst year being 2007. Management carried out in February might have affected the numbers. The brambles alongside about half my route were cut hard back. These will grow back but I think it might have affected the numbers this year. The ungrazed grass in section 9 was again cut short with the forage

harvester in October 2010. Four Longhorn bullocks were put in Park Field in July and remained there until the end of the recording season. I saw very few Red Admirals or Vanessids this year. There were large reductions in Browns, the numbers of Speckled Woods, Gatekeepers, Meadow Browns and Ringlets were all down. The only species to increase their numbers were Small and Green Veined Whites and Marbled Whites. On July 12th walking across the Nature Reserve, but not on the Butterfly Transect route, I thought I saw a Brown Argus. However I could not positively identify it. I returned to the area the next day, with camera and butterfly book, but could not find it again.

". Pat Watt.

Fryent Country Park TQ 195 876

First walked: 1986 2011 recorders: Leslie Williams, Michael Berthoud & Simon Mercer

Gunnersbury Triangle TQ 201 786

First walked: 1999 2010 recorder: Andy Brown,

"Numbers remain low. A reasonable showing of spring species was followed by disappointing numbers in summer. Comma and Peacock are usually present but almost absent this year. Reasonable numbers of Gatekeepers but no Meadow Browns seen." Andy Brown

Heartwood Forest TL163 109

First walked: 2010 2011 recorder: Andrew Steele

"A mixed year for my transect increases over last for Marbled White, Essex skipper, Small Skipper, Red admiral, Common Blue and purple hairstreak but Loss of Small Copper and big dips in the number of Peacock and Comma this year" Andrew Steele

Horsenden Hill East & Horsenden Hill West TQ 163 844

First walked: 2003 2011 recorders: David Howdon, Andrew Culshaw, Martin Smith

Hounslow Heath TQ121 749

First walked 2010 2011 recorders Zuza Kukielka, Rob Solomon, Richard Featherstone, David Gingell, Kayla Terry

"Another good uyear fpr butterflies on Hounslow heath. The highlight of the year being two independent sightings of Green Hairstreak. I hasn't been recorded for approximately 20 years". Zuza Kukielka

Kenwood TQ 271 874

First walked: 2005 2011 recorder: Mike Taylor

"The year began very promisingly with a record-breaking warm, dry spring when 8 Orange Tips were recorded - twice the previous high of 4 in 2007. However, disappointment followed with the coldest summer for 18 years. In consequence only 554 butterflies were recorded, easily Kenwood's 2nd worse year since the all-time-low of 497 in the bad-weather year of 2007. This is particularly disappointing because it follows our best ever year of 2010 with 689 butterflies, including an unprecedented high number of 73 Purple Hairstreaks. This year we recorded merely 18. However, the main reason for this year's low overall tally of butterflies was the low number of Meadow Browns, Kenwood's most common butterfly. In this, their worst year, only 134 were recorded. This is a pale shadow of their best year, 2008, when 323 were recorded, and it is well below the average of 225 for the years 2005-2010. Thankfully, it was not all bad news in 2011! The Small and Essex Skippers, numbering 83 combined, had their best year. Their comeback has been astronomical since the disastrous year of 2009 when only 9 were recorded! Finally, the Red Admiral, with 11 recordings, had its best year after 6 years of gradual decline." Mike Taylor

Lake Farm Country Park TQ088082

First walked: 2011 2011 recorders: Alison Shipley, N O'Connor

Lakeside Nature Reserve SP922124

First walked: 2011 2011 recorder: Brian Jessop

"Quite pleased with the 17 species recorded. As expected Speckled Wood were the most numerous. Holly Blue and Red Admiral did well, as did the Whites. But the highlight sighting had to be Silver-washed fritillary! A singleton male." - Brian Jessop

Lemsford Springs TL 223 121

First walked: 1998 2011 recorder: Neale Holmes-Smith

"Second lowest number in 10 years. Number of species less than previous two years. "Red" butterfly numbers less than 2010. "White" butterfly numbers less than 2010"." Neale Holmes-Smith

Mardley Heath TL 248 184

First walked: 2006 2011 recorders: Caroline Phillips & Sue Stephens

"On the 2011 Mardley Heath transect we recorded similar total butterfly numbers to last year but there were some marked individual variances. In spite of the hot spring, the early recordings were lower than last year, especially for Peacocks which possibly struggled to over-winter. The low Peacock numbers were partly offset by an increase in Orange Tips. Speckled Woods had a very good year: 77 total recordings from 44 in 2010. However it was a second year with not one Painted Lady seen; only two Common Blue recordings which was disappointing but a bumper year for Ringlets; happily, we again recorded (although low sightings), Silver Washed Fritillary, Small Copper and Purple Hairstreak" - Caroline Phillips

Marshalls Heath TL 161 149

First walked: 1989 2011 recorders: Trevor Chapman, K. Brown, John Murray

Millhoppers SP 900 149

First walked: 1998 2011 recorder: Margaret Noakes

Miswell Lane SP 914 117

First walked: 1999 2011 recorder: Brian Jessop

Northaw Great Wood Middleway TL 280 040 & Northaw Great Wood Bridleway TL 285 043

First walked: 1999 2010 recorder: Peter Walker

Patmore Heath TL 443 257

First walked: 1996 2010 recorder: Gavin Vicary

Perivale Wood TQ 159 837

First walked: 2005 2010 recorder: David Howdon, Andrew Culshaw, Martin Smith

Pryor's Wood TL 265 265

First walked: 2000 2011 recorder: Andy Holtham

"There have been no significant changes to the site this year. The meadow brown count was well down on recent years in contrast to the ringlet count which held up. Otherwise overall numbers were down on the average of the last 6 years, and the peak ringlet and meadow brown numbers came a little earlier; but none of this may be statistically significant." Andy Holtham

Railway Fields TQ 317 881

First walked: 1997 2011 recorders: Catherine Price, Caroline Graty, Keith Shallcross, Mary Hogan, Faye Duffill

Regents Canal TQ 356 830

First walked: 2001 2011 recorder: Donald Rooum

Sherrards Park Red Lion TL224140

First walked: 2010 2011 recorder Charlotte Fox

Sherrards Park Templewood TL235142

First walked: 2010 2011 recorder Charlotte Fox

Shrubhill Common TL 036 072

First walked: 2001 2011 recorder: Roger N. Prue

Stevenage TL 246 234

First walked: 1993 2011 recorder: Peter J. Clarke

"The numbers were about the same overall as last year with the early season butterflies like the Brimstone and Orange Tip having increased populations. However, on the downside, only 9 Common Blues and 4 Peacocks were seen all summer. The Peacock is a particular worry as I usually see at least 30 in each year." Peter Clarke.

Templewood Vale TL 235 143

First walked: 1998 2011 recorder: Neale Holmes-Smith

"Total numbers and number of species similar to last two years. No Peacocks or Small Tortoiseshells recorded. Gatekeepers declined considerably. Skippers have improved. Common Blues much reduced. "Brown" butterflies have

Therfield Heath TL 348 401, TL333395, TL333396, TL353404 & TL349398 (5 transects)

First walked: 1988 2011 recorder: Alan J. Beale

"My total figures appear to be up about 15% in total. Some species like Chalkhill Blue (up 16%), Marbled White and Small Heath did well. I only saw 1 Small Copper on the Heath this year and that was outside my counting sections. Also just one Painted Lady and Clouded Yellow. The White-letter hairstreak wasa an addition so finished up the year with 26 species". Alan Beale

The Warren TL 204 053

First walked: 1991 2011 recorder: John Moss

"After the usual slow start to the season, weekly totals built up gratifyingly to a peak at the end of June. Following a slow decline, they slumped steeply from mid-August producing an overall total of 898, slightly below 2010. 19 species were recorded, with 165 Small heath and 131 Gatekeeper, in both cases the most for 5 years. The "new" Marbled White colony seems stable, appearing suddenly in the same area for the 5th year. Common Blues were well down after a promising start and only 7 Peacocks, 2 Small Tortoiseshell and no Red Admiral were recorded. Management was mainly limited to occassional mowing of boundary rides, supplemented in July by "weed-wiping" of young thorn scrub and cutting and burning of large stands in the heather. This is very welcome. Vegetation in some areas is becoming ranker, offset by heavy rabbit grazing in others, but there is still abundant sorrel, trefoils, knapweed, coarse and fine grass and other food and nectar plants" John Moss

Tower Hamlets TL 204 053

First walked: 1999 2011 recorder: Terry Lyle, Keir Mottram

Tring Park SP 930 105

First walked: 1996 2011 recorder: Brian Jessop, Martin Hicks

"After many years of sterling recording, Brian Jessop has called it a day for this transect because his knees have given up. I can see why - and I thought Aldbury Nowers was bad enough! Having taken over this site half way through the season - it is too important a site and transect to lose - my results lack a little context. Small numbers of skippers were recorded and the whites well represented. Good numbers of Common blue and reasonable records of Brown argus. Silver washed fritillary was recorded on five dates in July and August which may suggest breeding although only one individual was seen each week but in more than one section overall. Reasonable numbers of browns but no small heath. The scarp slope battle with scrub re-growth continues; it will be useful to analyse the slightly modified transect sections in future to assess the principle habitats the route records." Martin Hicks

Ware Park TL 347 143

First walked: 1996 2011 recorder: Andrew Wood

"White-letter Hairstreak reappeared this year and there were again reasonable numbers of Small Tortoiseshell. Red Admiral was much in evidence during rthe latter part of the year". Andrew Wood

Waterford Heath North TL 317 154

First walked: 2000 2011 recorder: Janet Holmes

Waterford Heath South TL 317 149

First walked: 2008 2011 recorder: Steve Kiln

"22 species seen less than 2010. No painted ladies or clouded yellow. Good year for brown argus. It was not as good a year for Grizzled Skippers on south but good on north." Steve Kiln

Wingrave Lane SP926127

First walked: 2008 2011 recorder: David Thomas

Wood Lane Pirton TL 140 310

First walked: 2005 2011 recorder: Val Fullforth

"Noticeably higher numbers of Common Blue, Holly Blue with new species Brown Argus (19) seen over a 4 week period nectaring on wild scabious and knapweed in transect sections 2,3 and 4. Higher numbers of Whites, Orange Tip, Ringlet. large Skipper, Small Tortoiseshell. Only 2 Painted Lady seen in 2010 compared with 49 in 2009 and none in 2006. Good numbers of other Vanessa family. I attribute the lower number of Meadow Brown and Gatekeepers to the clearance of the grasses/verges in Section 1." Val Fullforth

Detailed Transect Records

The tables below and on the following pages give numbers of butterflies counted on each of the weekly transect walks described in the Transect Roundup, listed by species. Only those transects where there is reasonably complete coverage during the flight season are included. Mean values for all transects are listed along the bottom for each species.

The weeks 1 to 26 listed across the top refer to the 26 weeks starting on April 1st and ending on September 29th. The peak date listed in the final column is the actual date when highest numbers were seen in the case of univoltine species. For bivoltine or trivoltine species the date when the highest numbers for the particular brood that had highest peak values in the mean of all transects is used. The mean peak date for each species at the bottom right is weighted according to the total numbers seen on each transect.
