Species is the number of species					
walk, and Completeness gives the	e number of	weeks out of the 26 betwee	een Apri	l 1st and Se	eptember 29th when the

transect was not walked.

Transect results

Transects are the main method of measuring how butterfly populations change with time. The technique is simple, involving walking the same set route every week in good weather throughout the summer months, and noting down the numbers of each species of butterfly seen within about 5 metres.

Transect Roundup

Only notes received from the transect walkers or organisers are included.

Aldbury Nowers SP 952 129

First walked: 1992 2012 recorder: Paul Thrush

Balls Wood TL 344 106

First walked: 1994 2012 recorders: Andrew Wood & Alan Reynolds

"The overall number of butterflies was down 43% compared to 2011. This has to be set against the fact that 2012 was a dreadful summer with low sunshine and high rainfall totals. As a comparison the drop in transect totals across Hertfordshire and Middlesex between 2011 and 2012 (at the time of writing) was 40%. There was less clearing work on the transect route during the 2011/2012 winter. The major change being the widening of the northern section of section to match its southern section cleared the year before. The weather conditions mentioned above led to the wood being much wetter than in the previous two years, a major effect being the much denser growth of vegetation which had pluses and minuses for the butterfly population. The number of species seen on the transect was down one to its lowest ever at 16 species with no Essex Skipper, Holly Blue, Common Blue, Brown Argus, Small Copper or Purple Hairstreak recorded, these being balanced by a return of the Small Heath." Andrew Wood

Beane Hill TQ 199 873

First walked: 1988 2012 recorders: Leslie Williams, Michael Berthoud, Simon Mercer

"A wet year on the transect. More ponds were holding water in the summer of 2012 than during the preceding winter - that is the first time we have encountered that situation since pond monitoring commenced in 1983. And on the Fryent Country Park transect the hay harvesting commenced in September - the latest start date since 1983 (though there were a few years when we didn't harvest it at all)." Leslie Williams

Bedfont Lakes TO 080 724

First walked: 1996 2012 recorders: Richard Featherstone, Kayla Terry, Malgorzata Kukielka, Martin Gray "A low number of counts were completed due to some extremely wet weeks. This also had an effect on butterfly numbers, most notably the numbers of Brown Argus were very poor compared to the previous year. Our numbers of Common Blue have been inm decline for a number of years now, a fact we attibute to the increased spread of goats rue." Richard Featherstone

Bencroft Wood TL335065

First walked: 2004 2012 recorder: Steve Kiln

"Bencroft wood better than last year 3 more species incl silver washed & white admiral" Steve Kiln

Bishops Stortford Southern Country Park

First walked: 2004 2012 recorder: Bob Clift

"Only 3 species of butterfly in the park this year have shown an increase on 2011 – the Peacock, Small Heath and Meadow Brown. The latter doing rather well; maybe because it is one of the few species that will fly on dull days and even in light rain". Bob Clift

Brent Reservoir TQ 213 873

First walked: 2000 2012 recorders: Andrew Self, Roy Beddard

Bricket Wood TL 131 009

First walked: 1997 2012 recorders: Malcolm Hull & Colin Everett

Overall butterfly numbers were down this year - 40% below 2011 and 10% below the long term average. 2012 saw the wetest Spring on record and this had a bad effect on many species. Four species recorded on this site last year were not seen at all - Small Tortoiseshell, Small Copper, Common Blue and Brown Argus. Three species recorded their lowest totals in the 16 years this transect has been walked - Large White, Small White and Peacock. Other species which recorded totals of less than half their long term average numbers were Large Skipper, Green-veined White, Painted Lady and Gatekeeper. But it was not all bad news with two species, Silver-washed Fritillary and Red Admiral both producing their highest annual totals from this transect. Other species recording total numbers above their long term average were Essex Skipper, Orange Tip, Holly Blue, White Admiral, Marbled White and Ringlet. Compared to 2011, Comma showed the biggest improvement in numbers, with Red Admiral, White Admiral, Silverwashed Fritillary, Essex Skipper and Orange Tip numbers all increasing - species which didn't seem to be affected by the rain. Ringlet was the most numerous butterfly accounting for 30% of the total of all sightings. Purple Emperor was again recorded on the site, but has yet to be recorded on a transect walk. The most significant development of the year was the commencement of conservation grazing, initially by four English Longhorn Cattle. This should benefit the short grass loving butterfly species which are struggling to maintain a presence on this site. Coppicing and ride management through rotational cutting and the creation of scallops is continuing to benefit woodland and long grassland species." Malcolm Hull

Butterfly World TL 127 043

First walked: 2009 2012 recorder: Malcolm Hull, Mandy Floyd

"The fourth year of this transect produced some interesting results. Poor weather led to the lowest total number of sightings - 10% down from last year. But the total number of different butterfly species seen was 19 - the highest total to date. Ringlet was recorded for the first time, bringing the total number of species recorded on the transect to date to 22. Other grassland species did well with Meadow Brown, Gatekeeper, Large & Essex Skippers all recording their best totals to date. For garden butterflies the overall picture was mixed. Red Admiral numbers were well up, Painted Lady and Large White well down. Small Tortoiseshell was around in good numbers & Peacocks increased after poor totals in the last two years. There was also varying success for the blues, reflecting the fortunes of their food-plants. Three quarters of the Birds-foot Trefoil died off and this was reflected in a steep decline in the number of Common Blues. Kidney Vetch increased considerably in the antennae area and was matched by a big increase in Small Blues. First and second generations were recorded, with a female seen egg laying in June. 6-spot Burnet moths did spectacularly well, with this single species outnumbering all the butterflies put together." Malcolm Hull

Cranford Park TQ 101 779

First walked: 1997 2012 recorders: Alison Shipley, N. O'Connor,

Dale farm field, Kimpton TL153 173

First walked: 2012 2012 recorder: Juliet Morton

Danesbury Park TL 230 170

First walked: 1996 2012 recorder: Pat Watt

"The butterfly numbers were down again this year. It was the third worst year since I started recording at Danesbury Park LNR in 1996; the worst year being 2007. Previously on this site the Meadow Brown was the most common butterfly but in 2009 the Gatekeeper overtook it when Meadow Brown numbers declined. This year things changed again and the Meadow Brown again became the most recorded species. In fact these two species were the only ones seen in large numbers and kept it from being a disastrous year. I did not see a single Common Blue, which was very disappointing as numbers had been on the increase." Pat Watt

Fryent Country Park TQ 195 876

First walked: 1986 2012 recorders: Leslie Williams, Michael Berthoud & Simon Mercer

"A wet year on the transect but Meadow Browns did well." Leslie Williams

Gunnersbury Triangle TQ 201 786

First walked: 1999 2012 recorder: Andy Brown,

Harpenden Common TL 137 134

First walked: 2011 2012 recorder: Julie Rees

Heartwood Forest TL163 109

First walked: 2010 2012 recorder: Andrew Steele

"Recorded on site this year had 24 species including 1 new butterfly with 2 sighting of the white letter hairstreak. Sighting overall down by approx 200 individual butterfly which is't too bad with the weather that we had this year." Andrew Steele

Horsenden Hill East & Horsenden Hill West TQ 163 844

First walked: 2003 2012 recorders: David Howdon, Andrew Culshaw, Martin Smith

Hounslow Heath TQ121 749

First walked 2010 2012 recorders Malgorzataa Kukielka, Richard Featherstone,

"Poor weather this year did not help this yer's records and a number of species were recorded in very low numbers notably Purple hairstreaks. We were dissappointed not to see repeat appearances of Green and White-Letter hairstreaks although a Camberwell Beautyy early in the year was a highlight". Malgorzataa Kukielka

Kenwood TQ 271 874

First walked: 2005 2012 recorder: Mike Taylor

"Thanks to consistently appalling weather up here on the Highgate to Hampstead ridge, this was Kenwood's worst year so far. A total of 396 butterflies compares very badly to the 689 of our best year, 2010 - and it makes the 497 of our previous worst year, 2007, seem like happy days! The most worrying aspect of 2012 was the unexpected absence for the first time of the Peacock, a species in gradual decline at Kenwood since recording began in 2005. All other species showed significant reductions in numbers with the following exceptions: our fragile Small Copper population in the Sphagnum Bog fared quite well; the Red Admiral consolidated its recent comeback: the Meadow Brown recovered quite well from last year's all-time low." Mike Taylor

Lake Farm Country Park TQ088082

First walked: 2011 2012 recorders: Alison Shipley, N O'Connor

Lakeside Nature Reserve SP922124

First walked: 2011 2012 recorder: Brian Jessop

"Numbers down by 19% against last year's numbers, and only 13 species agaisnst 17 species seen last year. Increase in Ringlets, meadow Brown and Holly Blue". Brian Jessop

Lee Valley Turnford TL368043

First walked: 2012 2012 recorders: Simon Pegg, Steve Vaughan & Jennie Ward

Lemsford Springs TL 223 121

First walked: 1998 2012 recorder: Neale Holmes-Smith

"Missed two Jul;y weeks so total could be 20% geater. White butterflies down by over 50%. Brown butterdflies down by 100%." Neale Holmes-Smith

Mardley Heath TL 248 184

First walked: 2006 2012 recorders: Caroline Phillips & Sue Stephens

"2012 was a very difficult year with low recordings because of wet and cold weather. Meadow Brown recordings held up surprisingly well but all others were way down and sadly we failed to record any of our little Small Copper colony or Common Blue; fortunately we still recorded Silver - washedFritillary." Caroline Phillips

Marshalls Heath TL 161 149

First walked: 1989 2012 recorders: John Murray, Trevor Chapman

Millhoppers SP 900 149

First walked: 1998 2012 recorder: Margaret Noakes

Miswell Lane SP 914 117

First walked: 1999 2012 recorder: Brian Jessop

"Numbers down by well over 50%. The weather is defintely the main cause. Although in some weeks records the

weather was officially well below the 17C guide the walks were done and the recordings were sometimes better than wehen the weather was ideal! This was mainly due to the hot spots. 16species were recorded which is the lower end of the average numbers recorded since the transect started. Largest numbers were the browns, with the whites a lttle behind. Common Blue, a singleton appeared again. Small Tortoiseshell did extremely well at 23, mainly due to the farmer's butterfly bush!" Brian Jessop

Northaw Great Wood Middleway TL 280 040 & Northaw Great Wood Bridleway TL 285 043

First walked: 1999 2012 recorder: Peter Walker

"A pretty dismal year for recording. Several weeks there were no suitable dry days! And the best sighting of the year (Silver Washed Fritillery) was in between my two walks - typical. Also the Purple Emperors were at their usual location this year." Peter Walker

Parkland Walk South TQ 288 878

First walked: 2012 2012 recorder: Linda Douthwaite

Patmore Heath TL 443 257

First walked: 1996 2012 recorder: Gavin Vicary

Perivale Wood TQ 159 837

First walked: 2005 2012 recorder: David Howdon, Andrew Culshaw, Martin Smith

Pryor's Wood TL 265 265

First walked: 2000 2012 recorder: Andy Holtham

In common with many other transects I imagine, numbers at Pryor's Wood were well down this year - roughly a 1/3rd of what I'd expect. In particular, Meadow Brown numbers collapsed. Ringlet numbers seemed to hold up better; they were still down but not so markedly.

Railway Fields TQ 317 881

First walked: 1997 2012 recorders: Catherine Price, Caroline Graty, Keith Shallcross, Mary Hogan, Faye Duffill

Regents Canal TQ 356 830

First walked: 2001 2011 recorder: Donald Rooum

Roughdown Common (Lower) TL 048 055

First walked: 2012 2011 recorder: Brendan Sheriden

Sherrards Park Red Lion TL224 140

First walked: 2010 2012 recorder Charlotte Fox

Sherrards Park Reddings TL230 135

First walked: 2001 2012 recorder Barbara Wilton

Sherrards Park Sixways Mid section TL230 135

First walked: 2012 2012 recorder Barbara Wilton

Sherrards Park Templewood TL235 142

First walked: 2010 *2012 recorder* Charlotte Fox

Shrubhill Common TL 036 072

First walked: 2001 2012 recorder: Roger N. Prue

"It was a strange year for butterflies with all summer species and 2nd broods appearing much later than usual. Numbers for all of the Whites except for Orange Tip, and all of the Vanessids except for Red Admiral, were low. Common Blue numbers were also very low. Numbers of all of the Browns were up on last year except for Speckled Wood. I had my lowest ever annual figures for this species, as well as for Brimstone and Large White." Roger Prue

Stevenage TL 246 234

First walked: 1993 2012 recorder: Peter J. Clarke

"Unsurprisingly a bad year for butterflies with only 5 species having higher populations than last year (Peacock, Marbled White, Gatekeeper, Meadow Brown and Ringlet). However, only the increased number of Marbled Whites were significant - about 50% so very pleased to see that they are thriving here - mainly at the Shackledell Grassland. All other species suffered declines, most notably the 'cabbage' whites - the worst since 2001. In spite of a rather depressing season, I am optimistic that things will improve over the next few years especially in Whomerley Wood

where extensive tree-cutting took place last winter largely thanks to Herts and Middlesex Wildlife Trust and Stevenage Borough Council, opening up large areas to encourage growth of ground flora. Will the Silver-washed Fritillary return?" Peter Clarke

Stockers Lake TL 045 935

First walked: 2012 *2012 recorder:* Barbara James

"We have very slightly changed the route as one part is now completely overgrown and impassable. Our new route is probably 20 metres away from the old one. Otherwise the route is unchanged but some of the habitats have been managed with trees felled, meadows cut (or not) etc" Barbara James

Templewood Vale TL 235 143

First walked: 1998 2012 recorder: Neale Holmes-Smith

"Missed two Jul;y weeks so total could be 20% geater. White butterflies down by over 200%. Brown butterdflies down by 50%." Neale Holmes-Smith

Therfield Heath TL 348 401, TL333395, TL333396, TL353404 & TL349398 (5 transects)

First walked: 1988 2012 recorder: Alan J. Beale

"Chalkhill blues were up by 40% on last year. Marbled Whites by 10%. Had a brief appearance of a Dark-green Fritillary on the rifle range In 16 years of recording I hadn't seen any before! I didn't see Small Copper, painted Lady, Clouded Yellow or White-letter Hairstreak at all. A lot of the more common species were well down due to clearance of shrubs and the weather, Still the total recorded was only 8 ddown on last years so it was good for some species but not for others." Alan Beale

The Warren TL 204 053

First walked: 1991 2012 recorder: John Moss

"This was by far the most dissappointing season since I took over the transect in 2004, with only 620 butterflies recorded. It was mid June before numbers rached double igures peaking at 105 in late July. and declining quite steeply from mid August. At 275 the meadow Browns were well up 2011, Marbled Whites and Ribglets comfortably so. Most others were down, all Whites and Common Blues dramatically so with only 13 and 7 respectively. At 86 Small heaths were were only half the 2011 total. A single Holly Blue in September was a new species probably straying from the nearby wood. 17 species were recorded with no confirmed sightings of Purple hairstreak or Essex Skipper. Management was limited to occassional mowing of boundary rides supplemented in mid August by cutting of a braod swathe upto 30m around much of the boundary. including much of the transect route. Despite last year's "weed wiping" of young thron much of the site continues to scrub over, with other vegetation much ranker after the wet season. There is still abundant sorrel, Trefoils, Knapweed, coarse and fine grasses and other food and nectar plants."

Tower Hamlets TL 204 053

First walked: 1999 2012 recorder: Terry Lyle

"The White-letter Hairsteak was the first record for the park. The Small Tortoiseshell was the only one seen all year. Three species were seen as single specimens, not on the transect; Painted lady, Purple Hairstreak, Silver-washed Fritillary." Terry Lyle

Tring Park SP 930 105

First walked: 1996 2012 recorder: Martin Hicks

Ware Park TL 347 143

First walked: 1996 2012 recorder: Andrew Wood

"A poor year due to the weather. The broad headlands bordering some sections were all ploughed to the field boundary over the winter of 2011/2012. Highlight was a mating pair of Marbled Whites, a species only seen as odd speciemns here before." Andrew Wood

Waterford Heath North TL 317 154

First walked: 2000 2012 recorder: Janet Holmes

Waterford Heath South TL 317 149

First walked: 2008 2012 recorder: Steve Kiln

Wingrave Lane SP926127

First walked: 2008 2012 recorder: David Thomas

Wood Lane Pirton TL 140 310

First walked: 2005 2012 recorder: Val Fullforth

Detailed Transect Records

The tables below and on the following pages give numbers of butterflies counted on each of the weekly transect walks described in the Transect Roundup, listed by species. Only those transects where there is reasonably complete coverage during the flight season are included. Mean values for all transects are listed along the bottom for each species.

The weeks 1 to 26 listed across the top refer to the 26 weeks starting on April 1st and ending on September 29th. The peak date listed in the final column is the actual date when highest numbers were seen in the case of univoltine species. For bivoltine or trivoltine species the date when the highest numbers for the particular brood that had highest peak values in the mean of all transects is used. The mean peak date for each species at the bottom right is weighted according to the total numbers seen on each transect.
